THE CREATIVE ART STUDIO

The Creative Art Studio is designed to engage every student's creative mind and guide them in making masterpieces they will be proud of. To do this, we will explore the world of both two- and three-dimensional media while focusing on a specific artist or art style each week. Lessons may include drawing, painting, sculpting, weaving and printmaking while also focusing on building skill through the elements of art, design, and technique. Students will be provided with all materials needed to complete all of their masterpieces. Students will complete their own work by following the teacher in a step-by-step method that allows them to see projects take shape from beginning to end, but still allowing each student to develop their own style. Most projects will go home with the student the same day.
